# DIGITAL DATELINE

“BUILD IT LIKE WE OWN IT”

On **March 4, 2022**, we learned that while GM facilities located in a county with a CDC designation of low or medium risk could move to optional masking, facilities located in CDC high risk counties must require masking.

Recently, high numbers of new COVID-19 cases and hospitalizations in Oakland County, where Orion Assembly is located, have resulted in the CDC risk rating being elevated to high risk (orange on the map below).

With this development, effective start of shift **Tuesday, May 17**, Orion Assembly must resume **mandatory wearing of GM-issued face masks**. **N95** and **KN95** masks are also allowed. People are encouraged to physical distance when eating and drinking and not wearing a mask.

**What you need to know:**

GM Medical will continue to regularly monitor COVID-19 county risk levels through this online CDC tracking tool: <https://www.cdc.gov/coronavirus/2019-ncov/your-health/covid-by-county.html>

When considering protocol / protection level increases and decreases at sites, GM Medical assesses positive test results among GM employees and absenteeism due to COVID as additional determination factors.

If you have symptoms associated with COVID-19, test positive or become a close contact, notify your supervisor, or site absence line and site Medical.

GM will follow the CDC’s Quarantine and Isolation Guidelines for employees testing positive or identified as close contacts. These guidelines can be viewed at: <https://www.cdc.gov/coronavirus/2019-ncov/your-health/quarantine-isolation.html>

GM continues to encourage employees to get vaccinated and boosted.

As Oakland County risk levels change, GM Medical will let us know as soon as it is safe to return to optional mask wearing at Orion Assembly.
